Product Overview

Self-Contained Cooling Solution

This monoblock air conditioner is a self-contained cooling unit designed for efficient spot cooling in both residential and commercial spaces. Featuring a compact, space-saving design, it eliminates the need for separate external units, making it an ideal choice for environments where traditional split systems are not feasible. The unit is engineered for quiet operation, energy efficiency, and ease of installation, requiring only a power outlet and a window for exhaust venting.

Technical Specifications

System Type	Inverter
Installation	Wall-mounted / Self-contained

Key Features

Key Benefits

- Low noise operation
- Space-saving design
- Easy installation process
- Environmentally friendly refrigerant
- Energy efficient

Control Features	Digital Display, Adjustable Louvers, Temperature Control, Fan Speed Adjustment, Timer Function
------------------	--

Maintenance

Maintenance	Includes a washable filter for maintaining air quality.
