

# Self-Contained Refrigeration and Ventilation Unit

This self-contained unit provides both refrigeration and ventilation. It is designed for use in industrial HVAC systems, offering temperature and humidity control.

## Product Overview

### Industrial Refrigeration and Ventilation System

This self-contained unit is engineered for precision temperature and humidity control in demanding industrial and commercial environments. It features an integrated high-efficiency blower motor assembly for consistent air circulation alongside a robust heat exchanger. The design includes a dedicated condensate drain pan to ensure reliable moisture management during operation.

## Technical Features

### Key Components

- Blower motor assembly
- Heat exchanger
- Condensate drain pan

## Applications

### Primary Applications

HVAC Systems, Commercial Cooling, Industrial Humidity Control, Temperature Regulation
