

Self-Leveling Cross Line Laser Level

This self-leveling cross line laser projects highly visible red laser lines. It is designed for accuracy and efficiency in horizontal and vertical alignment tasks.

Product Overview

Professional Precision Instrument

This self-leveling cross line laser is engineered for high-accuracy alignment and leveling tasks in professional environments. It features a smart pendulum system that automatically compensates for surface irregularities while signaling out-of-level conditions to prevent errors. Designed for versatility, the unit supports multiple mounting standards, making it an essential tool for framing, tiling, and interior installation projects.

Technical Specifications

Tripod Mounting Threads

- 1/4" - 20
- 5/8" - 11

Operating Range

50 m

Maximum Distance

Core Features

Self-leveling, Smart Pendulum System, Bright Light Compatible, Horizontal & Vertical Projection
