Product Overview

Versatile Material Handling

The FJZ30 Self-Loading Dumper is a high-performance machine engineered for efficient material transport in construction and industrial settings. It features an articulated frame for superior maneuverability in confined spaces and a robust diesel engine for consistent power. The integrated hydraulic system enables smooth loading and precise dumping, streamlining site operations and increasing overall productivity.

Technical Specifications

Load Capacity

10 t

Maximum Payload

Fuel Type

Diesel

Drive System

4x4

Gross Vehicle Weight

2400 kg

Transmission

Automatic

Dimensions

Dimensions (L x W x H)

5000 x 1700 x 2750 mm

Features

Operational Advantages

- Articulated frame for small turning radius
- High-performance engine for robust power
- Improved hydraulic filtration system
- Rear-mounted diesel engine for flexible operation
- Strong hydraulic pressure unloading system

Logistics

Delivery Lead Time

15 days after receipt of payment
