

# Self-Locking Nylon Cable Tie

Nylon cable ties are engineered for securing and organizing cables and wires. These durable ties are made from nylon, providing tensile strength, abrasion resistance, and a self-locking mechanism for a secure hold.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade Cable Management

These high-quality nylon cable ties are designed for securing and organizing cables, wires, and various other items efficiently. Engineered with a robust self-locking mechanism, they provide a secure and reliable hold for demanding applications. Their durable construction offers excellent tensile strength and resistance to abrasion, chemicals, and extreme temperatures, making them suitable for both indoor and outdoor environments.

## Technical Specifications

### Anti-fire Class

94V-2

### Material

Nylon

### Mechanism

Self-locking

## Applications

### Ideal Applications

- Electrical installations
- Automotive repairs
- Network cabling
- General-purpose fastening
- Cable bundling
