

Self-Priming Cast Iron Centrifugal Pump

This self-priming centrifugal pump is designed for efficient fluid transfer. Its cast iron construction ensures durability and lasting performance.

Product Overview

High-Efficiency Fluid Transfer Solution

This self-priming centrifugal pump is engineered for reliable and efficient fluid transfer across industrial, agricultural, and construction environments. Constructed from robust cast iron, it ensures long-lasting durability even in demanding operational conditions. The belt-driven mechanism provides versatile speed and power options, while the open impeller design effectively handles fluids containing solids, making it an ideal choice for irrigation and dewatering tasks.

Technical Specifications

Impeller Design	Open Impeller (Solids Handling)
Drive Type	Belt-Driven
Housing Material	Cast Iron

Applications

Primary Functions

- Irrigation
- Dewatering
- General Water Transfer

Recommended Sectors	Industrial, Agricultural, Construction
---------------------	--
