

Self-Priming Centrifugal Gasoline Water Pump

This self-priming centrifugal water pump is designed for efficient water transfer. It features a robust gasoline engine, delivering reliable performance for irrigation, drainage, and general water pumping needs.

Overview

High-Efficiency Water Transfer Solution

This self-priming centrifugal water pump is engineered for demanding fluid transfer tasks including agricultural irrigation and drainage operations. Powered by a robust 7hp gasoline engine, it offers a reliable and portable solution for remote areas lacking electricity. The unit is housed in a durable steel protective frame to ensure longevity and stability during heavy-duty operation.

Technical Specifications

Engine Performance

7 hp

Power Output

210 ml

Displacement

Pumping Performance

65 m

Maximum Lift

20 m³/h

Flow Rate

Inlet/Outlet Diameter 50 mm

Engine Model 170F

Features

Key Features Self-Priming, Gasoline Powered, Steel Protective Frame, Centrifugal Design
