

Self-Priming Centrifugal Water Pump, 1 inch Outlet

This self-priming centrifugal water pump is designed for irrigation and drainage. It features a gasoline engine for portable power.

Product Overview

Professional Self-Priming Water Pump

This high-efficiency, 1-inch centrifugal water pump is engineered for reliable performance in irrigation and drainage tasks. Powered by a robust gasoline engine, this portable unit is ideal for agricultural fields, construction sites, and remote water transfer needs. Its self-priming capability ensures ease of operation, while the lightweight design allows for maximum mobility across diverse job sites.

Performance Metrics

Performance Highlights

8 m³/h

Flow Rate

20 m

Max Lift

8 m

Suction Length

Technical Specifications

Engine and Physical Specs

Parameter	Value
Model Number	QGZ25-20A
Displacement	32.6 cc
Power Rating	0.9 kW / 6500 rpm
Outlet Diameter	25 mm (1 inch)
Engine Model	1E36F-2
Net Weight	7 kg

Logistics

Package Size	32 x 31 x 42 cm
