Overview

JET Series Self-Priming Centrifugal Pump

The JET series water pressure pump is a high-performance, self-priming centrifugal pump engineered for reliable water transfer and pressure boosting. Built with a robust cast iron pump body and motor support, it ensures long-term durability in both residential and commercial environments. The system features a high-efficiency electric motor equipped with thermal overload protection to prevent overheating, making it a safe and versatile solution for clean water supply, irrigation, and pressure boosting tasks.

Technical Specifications

Model Number	JET60-200
Operating Frequency	50Hz, 60Hz
Motor Protection	Yes

Materials & Construction

Construction Materials

Component	Material
Pump Body	Cast Iron
Motor Bracket	Cast Iron
Impeller	Brass

Applications

Recommended Applications

- Domestic water supply
- Pressure boosting
- Irrigation systems
- General water transfer
