

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is suitable for drainage, irrigation, and general water transfer. It features a cast iron pump housing and impeller, powered by an electric motor for efficient and reliable performance.

Product Overview

High-Efficiency Centrifugal Pumping Solution

This self-priming centrifugal water pump is engineered for demanding applications including industrial, agricultural, and municipal water management. Featuring a robust cast iron housing and impeller, it ensures long-term reliability and durability in various environments. The electric motor-driven design offers consistent, high-performance fluid transfer and drainage capabilities.

Technical Construction

Housing Material	Cast Iron
Impeller Material	Cast Iron
Power Source	Electric Motor

Operational Capabilities

Pump Mechanism	Self-Priming • Centrifugal
Key Applications	Drainage, Irrigation, Water Transfer, Industrial, Municipal
