

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is designed for domestic water supply and irrigation. Its robust cast iron body ensures durability, while the high-efficiency motor provides reliable performance.

Product Overview

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is designed for efficiency and reliability in clean water applications, even when air is present. It offers quiet operation and low energy consumption, making it an ideal choice for domestic and civil water pressurization, distribution, and irrigation systems. Built with a robust cast iron body, this pump ensures durability and long-term performance for household and garden needs.

Technical Specifications

Pump Type	Self-Priming Centrifugal
Suitable Liquids	Clean water, Non-chemically aggressive fluids
Installation	Enclosed environment or sheltered from inclement weather

Key Features

Key Benefits

- Quiet operation
- High reliability
- Low energy consumption
- Self-priming capability with air handling

Applications

Recommended Applications

Domestic water supply • Pressure boosting • Rain water recovery • Irrigation systems

Construction

Construction Material	Cast iron pump body
