

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is designed for efficient water transfer. It features a robust engine, durable pump housing, and a protective frame for portability and longevity.

Product Overview

Efficient Fluid Transfer

This self-priming centrifugal water pump is engineered for high-performance water transfer across demanding environments. It features a robust engine integrated with a durable pump housing to ensure consistent operation and long service life. Designed with a protective frame, it provides excellent portability and protection for use in irrigation, construction sites, and general water management tasks.

Technical Specifications

Engine Power

6.5 HP

Engine Output

Model Designation

MH 30

Application

Suitable Applications

Irrigation, Construction, General Water Transfer

Design Features

Construction Highlights

- Self-priming mechanism
- Durable pump housing
- Protective carry frame
- Portable design
