

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is designed for domestic water supply, irrigation, and pressure boosting. It features a durable construction with a cast iron pump body and a high-performance motor.

Overview

High-Performance Water Transfer

This self-priming centrifugal water pump is expertly engineered for domestic water supply, irrigation, and pressure boosting applications. Featuring a robust cast iron pump body, it offers exceptional durability and reliable performance for clean water transfer. Designed for efficiency, it is an ideal solution for drawing water from wells, tanks, and other sources requiring consistent suction lift.

Technical Specifications

Pump Type	Self-priming centrifugal
Body Material	Cast Iron

Applications

Compatible Sources

- Wells
- Water Tanks

Primary Applications	Domestic Water Supply, Irrigation, Pressure Boosting, Clean Water Transfer
