

Self-Priming Centrifugal Water Pump for Pools and Spas

This self-priming centrifugal pump is designed for water circulation and filtration in swimming pools and spas. It features a durable thermoplastic body, corrosion-resistant components, and a high-efficiency motor for reliable performance.

Overview

High-Efficiency Water Circulation

This self-priming centrifugal pump is engineered for robust performance in both swimming pool and spa filtration systems. Featuring a durable thermoplastic body and corrosion-resistant components, it ensures long-term reliability in demanding environments. The high-efficiency motor provides consistent water flow, making it an ideal choice for residential and commercial water circulation requirements.

Technical Specifications

Pump Type	Self-priming centrifugal
Construction Materials	Thermoplastic body, Corrosion-resistant components

Performance

Application Compatibility

- Swimming pools
- Spas
- Residential water systems
- Commercial water systems

Primary Function

Water Circulation • Filtration
