

Self-Priming Centrifugal Water Pump with Pressure Tank

This self-priming centrifugal pump is designed for domestic water supply and pressure boosting applications. It features a pressure tank for maintaining constant pressure and an automatic pressure switch for on-demand operation.

Product Overview

JET Automatic Working Pressure System

The JET Automatic Working Pressure System is a high-performance self-priming centrifugal pump engineered for domestic water supply and pressure boosting. Equipped with an integrated pressure tank and an automatic pressure switch, it ensures consistent water flow on demand. Its durable construction makes it an ideal solution for residential water systems, garden irrigation, and general household pressure needs.

Technical Specifications

Pump Type	Self-priming centrifugal
Key Features	Self-Priming, Automatic Pressure Switch, Integrated Pressure Tank

Applications

Suitable Applications

- Domestic water supply
- Pressure boosting
- Garden irrigation
- Household water systems

Installation

Installation Details	Includes flexible hose connection for simplified installation.
