Product Overview

Efficient Water Transfer Solution

The CJSW self-priming jet pump is designed for efficient water transfer, pressure boosting, and irrigation needs. Featuring a robust construction, it is capable of handling air and small debris, ensuring consistent operation in residential and light commercial settings. The unit is equipped with a motor designed for continuous duty and includes thermal overload protection for enhanced safety and longevity.

Operating Limits

Max. Suction Head	8 m
Max. Liquid Temperature	60
Max. Ambient Temperature	40

Performance Features

Duty Cycle	Continuous duty
Safety Features	Thermal Overload Protection, Self-Priming

Applications

Ideal Use Cases

- Domestic water supply
- Pressure boosting
- Irrigation
- Light commercial water transfer
