

Self-Priming Electric Oil Transfer Pump with Meter

This self-priming pump is designed for transferring diesel fuel and light oils. It features a mechanical flow meter for accurate dispensing and robust construction.

Product Overview

Efficient Fuel and Oil Transfer

This self-priming electric oil transfer pump is engineered for the reliable movement of diesel fuel and light oils. Equipped with an integrated mechanical flow meter, it ensures accurate dispensing for precise inventory management. Its robust construction and included hose and nozzle kit make it an ideal solution for workshops, agricultural operations, and industrial sites requiring mobile fuel transfer capabilities.

Technical Specifications

Metering Capabilities

- Mechanical flow meter
- LITER display
- TOTAL volume tracking

Included Equipment

- Dispensing nozzle
- Transfer hoses
- Integrated flow meter

Pump Type

Self-priming electric transfer pump

Suitable Applications

Diesel Fuel Transfer, Light Oil Transfer, Workshop Use, Agricultural Use, Industrial Settings
