

Self-Priming Jet Pump

This self-priming jet pump is designed for efficient water transfer and boosting applications. It features a durable construction with a stainless steel pump body and a robust motor, ensuring reliable performance and longevity.

Overview

Efficient Water Transfer Solution

The self-priming jet pump is engineered for reliable water transfer and pressure boosting applications. Featuring a durable stainless steel construction and a robust motor, it is designed for longevity and consistent performance in demanding environments. Its self-priming capability allows for quick suction establishment, making it an ideal choice for domestic water supply, irrigation, and pressure boosting systems where the water source may be below the pump level.

Technical Details

Model Identifier	KJ-751S
------------------	---------

Key Features

Applications	Domestic Water Supply, Irrigation, Pressure Boosting
--------------	--

Construction

Pump Body Material	Stainless Steel
--------------------	-----------------

Performance

Self-Priming	Yes
--------------	-----
