

# Self-Priming Jet Pump for Water Transfer

This self-priming jet pump is designed for efficient water transfer and boosting. It features a robust construction for durability and reliable performance in various applications.

## Overview

### High-Efficiency Water Transfer Solution

The DP self-priming jet pump is engineered for reliable water transfer and pressure boosting in residential and light commercial environments. Its robust construction ensures long-term durability, while the advanced self-priming capability simplifies installation and minimizes routine maintenance. Designed to deliver consistent flow and pressure, this unit is an ideal choice for demanding water management applications.

## Technical Specifications

### Pump Type

Self-Priming • Jet Pump

### Model Identifier

DP370B

## Key Features

### Suitable Applications

- Residential water boosting
- Light commercial water transfer
- General water supply systems

## Performance

### Performance Highlights

**370 W**

Power Rating
