Product Overview

Reliable Water Transfer Solution

This self-priming jet pump is engineered for efficient water transfer and pressure boosting in both domestic and agricultural settings. Featuring a robust cast iron body and a motor designed for continuous duty, it ensures reliable performance for irrigation and household water supply. The unit is optimized for pumping clean water and includes integrated thermal overload protection for safe, long-term operation.

Technical Specifications

Max Suction Lift	9 m
Maximum Head	50 m
Pump Type	Centrifugal with ejector

Construction & Materials

Motor Features

- Single-phase
- Thermal overload protection
- Continuous duty

Body Material	Cast Iron
---------------	-----------

Application Suitability

Ideal Applications	Irrigation, Domestic Water Supply, Pressure Boosting, Well Water Transfer
