

# Self-Priming Jet Pump for Water Transfer

This self-priming jet pump is designed for efficient water transfer and boosting applications. It features a robust construction with a cast iron pump body and a durable impeller, ensuring reliable performance and long service life.

## Overview

### High-Efficiency Self-Priming Jet Pump

This self-priming jet pump is engineered for reliable water transfer and pressure boosting across residential, agricultural, and light industrial applications. Featuring a robust cast iron body and a durable impeller, it is built for longevity and consistent performance. The integrated jet assembly provides enhanced suction capabilities, making it an ideal solution for irrigation and water supply systems requiring dependable flow rates.

## Technical Specifications

### Key Features

- Self-priming capability
- Thermal overload protection
- Enhanced suction via jet assembly
- Low maintenance design

### Material Construction

Cast Iron Body, Durable Impeller

## Applications

### Suitable Applications

Residential Water Supply • Agricultural Irrigation • Light Industrial Use • Pressure Boosting Systems
