

Self-Priming Jet Water Pump

This self-priming jet water pump is designed for efficient water transfer and boosting applications. With a robust construction and powerful motor, the pump provides reliable performance for residential and light commercial use.

Product Overview

Reliable Self-Priming Performance

This self-priming jet water pump is engineered for efficient water transfer and pressure boosting in domestic and civil applications. Designed to handle clean water even when air is present, it offers a quiet and reliable solution for residential and light commercial needs. Its robust construction ensures durability, making it ideal for water distribution, irrigation, and rain water recovery systems.

Technical Specifications

Recommended Applications

- Domestic Water Pressurization
- Civil Water Distribution
- Rain Water Recovery
- Irrigation Systems

Construction Materials

Cast Iron Body, Brass Bolts

Operational Features

Key Operational Benefits

Self-Priming • Quiet Operation • Low Energy Consumption • Handles Air-Entrained Water

Installation Requirements

Installation Environment

Must be installed in an enclosed environment or sheltered from inclement weather.
