

Self-Priming Jet Water Pump for Domestic Use

This self-priming jet water pump is designed for domestic water supply. It is suitable for pumping clean water from wells or tanks and features a robust motor, pressure gauge, and pressure tank.

Product Overview

Domestic Water Solutions

This self-priming jet water pump is specifically engineered for efficient water distribution in residential settings. It is designed to handle clean water sources, making it an ideal choice for domestic water supply from wells or tanks. Equipped with a robust motor, integrated pressure gauge, and pressure tank, this unit ensures reliable and consistent water pressure for household needs.

Technical Specifications

Integrated Features

- Robust electric motor
- Pressure gauge
- Pressure tank included

Pump Type	Self-priming jet pump
Application	Domestic, Well Water, Tank Supply, Residential
