

Self-Priming Peripheral Pump with Stainless Steel Body

This self-priming pump is designed for pumping clean water. It features a stainless steel pump body and a pressure tank, making it suitable for domestic water supply, small irrigation, and pressure boosting applications.

Product Overview

Versatile Self-Priming Solution

This self-priming peripheral pump is engineered for efficient water transfer and pressure management. Featuring a robust stainless steel body, it is optimized for pumping clean water in various domestic and light commercial settings. Its reliable design is ideal for small-scale irrigation, consistent domestic water supply, and effective pressure boosting.

Technical Specifications

Pump Body Material	Stainless Steel
Priming Type	Self-priming
Key Features	Stainless Steel Body, Pressure Tank Included, Clean Water Compatible

Applications

Suitable Applications

- Domestic water supply
- Small irrigation systems
- Pressure boosting applications
