

Self-Priming Peripheral Water Pump

This self-priming peripheral water pump is designed for efficient water transfer and boosting. It features a robust motor with cooling fins for thermal protection, ensuring reliable performance and extended lifespan.

Product Overview

Reliable Water Transfer and Boosting

This self-priming peripheral water pump is engineered for efficient water transfer and reliable pressure boosting in various environments. Featuring a robust motor design with integrated cooling fins, it ensures superior thermal protection for long-term operation. Built from durable materials, this unit is perfectly suited for demanding applications including domestic water supply and garden irrigation systems.

Technical Specifications

Pump Type	Self-Priming Peripheral
Cooling Mechanism	Thermal Protection, Cooling Fins

Key Features

Suitable Applications

- Domestic water supply
- Garden irrigation
- Water pressure boosting

Durability

Robust Design • High-Durability Housing
