

Self-Priming Peripheral Water Pump

This self-priming peripheral water pump is designed for clean water transfer and boosting applications. It features a durable construction with a robust motor for reliable performance, making it suitable for domestic water supply, garden irrigation, and pressure boosting systems.

Product Overview

Versatile Clean Water Solution

This self-priming peripheral water pump is engineered for efficient clean water transfer and pressure boosting tasks. Its robust construction ensures long-term reliability in demanding domestic and light commercial environments. The compact design facilitates seamless installation in irrigation systems or residential water supply lines.

Performance Metrics

Key Applications

Clean Water Transfer, Pressure Boosting, Garden Irrigation, Domestic Supply

Technical Features

Design & Construction

- Self-priming capability
- Robust motor design
- Durable housing materials
- Compact and portable form factor
