

# Self-Priming Peripheral Water Pump

This self-priming peripheral pump is suitable for clean water and non-aggressive liquid transfer. The compact design ensures easy installation and operation for domestic water supply and small-scale irrigation.

## Product Overview

### Self-Priming Peripheral Water Pump

This self-priming peripheral pump is engineered for the efficient transfer of clean water and non-aggressive liquids. Its compact design facilitates easy installation and operation, making it an ideal choice for domestic water supply, small-scale irrigation, and pressure boosting applications. Equipped with thermal overload protection and a durable construction, this pump ensures reliable, continuous duty performance in various environments.

## Performance Metrics

### Maximum Suction Lift

**8 m**

Max Suction Lift

## Operating Limits

Maximum Liquid Temperature	60 °C
Maximum Ambient Temperature	40 °C

## Technical Features

Key Features	Self-priming, Thermal overload protection, Continuous duty, Compact design
--------------	--

## Applications

### Primary Applications

- Domestic water supply
- Small-scale irrigation
- Pressure boosting
