

Self-Priming Pure Water Pump

This self-priming pure water pump is designed for efficient water transfer and boosting. It is suitable for various applications requiring a clean water supply and features a robust construction for durability.

Overview

High-Efficiency Pure Water Solution

This self-priming pure water pump is engineered for reliable water transfer and pressure boosting applications. Designed with a robust construction, it ensures durability and consistent performance for demanding environments. Its user-friendly design simplifies maintenance, making it an ideal choice for clean water supply systems requiring long-term operational stability.

Technical Specifications

Pump Type

Self-Priming • Pure Water

Model Identifier

GS126

Primary Applications

Water Transfer, Pressure Boosting, Clean Water Supply
