

# Self-Priming Pure Water Pump

This self-priming pure water pump is designed for efficient and reliable water transfer. It is suitable for various applications, including domestic water supply, irrigation, and boosting water pressure.

## Product Overview

### Efficient Water Transfer Solution

The GS120 self-priming pure water pump is engineered for reliability and consistent performance in various fluid transfer applications. Featuring a robust construction, this pump is designed to withstand demanding environments while maintaining efficient operation. Its self-priming capability simplifies start-up procedures, making it an ideal choice for domestic water supply, irrigation systems, and pressure boosting.

## Technical Specifications

Model	GS120
Pump Type	Self-Priming
Compatible Fluids	Pure Water

## Applications

### Primary Applications

- Domestic Water Supply
- Irrigation
- Water Pressure Boosting

## Performance Features

### Key Benefits

Self-Priming • Robust Construction • Reliable Flow
