

# Self-Priming Rotary Vane Oil Transfer Pump with Flow Meter

This self-priming rotary vane pump is designed for oil transfer. It features an integrated bypass valve and a mechanical flow meter for accurate dispensing.

## Product Overview

### Professional Oil Transfer Solution

The YB-T3 is a high-performance self-priming rotary vane pump designed for efficient oil transfer in demanding environments like workshops, construction sites, and agricultural settings. It features an integrated bypass valve and a precision mechanical flow meter, ensuring accurate dispensing for every task. Housed within a robust steel frame for maximum portability and durability, this system comes fully equipped with hoses and fittings for immediate deployment.

## Performance Specifications

### Performance Metrics

**50 L/min**

Flow Rate

**2 bar**

Max Pressure

**1 %**

Meter Accuracy

## Technical Details

|                   |            |
|-------------------|------------|
| Power Supply      | 230V AC    |
| Inlet/Outlet Size | 1 inch BSP |

## Features

|              |   |
|--------------|---|
| Key Features | Self-priming, Rotary Vane Mechanism, Integrated Bypass Valve, Mechanical Flow Meter, Portable Steel Frame |
|--------------|---|

## Application

### Recommended Applications

- Automotive Workshops
- Construction Sites
- Agricultural Operations
