

Self-Priming Stainless Steel Jet Pump

This self-priming jet pump is designed for efficient water transfer and boosting in domestic systems. Its stainless steel construction ensures durability and resistance to corrosion for applications such as garden irrigation and pressure boosting.

Overview

High-Performance Stainless Steel Jet Pump

The JEX self-priming jet pump is engineered for efficient water transfer, pressure boosting, and irrigation applications. Constructed with a durable stainless steel body and impeller, it offers excellent resistance to corrosion and ensures a long service life. Its self-priming capability allows for reliable start-up even when air is present in the suction line, while the thermally protected motor ensures safety and consistent performance.

Operating Limits

Max. Suction Head	8 m
Max. Liquid Temperature	50
Max. Ambient Temperature	40
Duty Cycle	Continuous duty

Construction & Features

Safety Features

Thermally Protected Motor • Corrosion Resistant • Self-Priming

Key Materials

Stainless Steel Body, Stainless Steel Impeller

Applications

Suitable Applications

- Domestic water supply
- Irrigation systems
- Pressure boosting
- Clean water transfer
