

Self-Priming Water Pump

This self-priming pump is engineered for dependable performance in diverse pumping tasks. Its durable construction and self-priming design ensure consistent operation, even with fluctuating liquid levels.

Product Overview

High-Efficiency Self-Priming Solution

The QHB series self-priming pump is a robust and efficient solution engineered for various liquid pumping applications. Its durable construction ensures reliable operation, even in scenarios requiring intermittent liquid supply. The unit is designed for long-term performance and ease of maintenance, making it a dependable choice for industrial needs.

Technical Specifications

Performance Metrics

40 mm

Port Diameter

Inlet and Outlet Size	40 mm
Key Features	Self-Priming, Durable Construction, Easy Maintenance
