

Self-Priming Water Pump

This self-priming pump efficiently transfers fluids. Its durable construction ensures long-lasting performance in various applications.

Product Overview

High-Efficiency Self-Priming Solution

The NG-100 is a professional-grade self-priming water pump engineered for reliable fluid transfer in demanding environments. Its advanced design eliminates the need for manual priming, allowing for quick and hassle-free operation. Built with a focus on robust construction and longevity, it provides consistent performance for critical infrastructure tasks.

Technical Specifications

Key Operational Features

- Automated self-priming capability
- Robust heavy-duty construction
- High durability design for long-term service

Model Identification	NG-100
Application Scope	Irrigation, Dewatering, Fluid Transfer
