

Self-Priming Water Pump

This self-priming pump is designed for efficient water transfer and circulation. It features a durable stainless steel housing and robust electric motor, making it suitable for HVAC&R systems, industrial processes, and domestic water supply.

Product Overview

Professional Water Circulation Solution

This self-priming water pump is engineered for high-efficiency water transfer and reliable circulation across a wide range of industrial and domestic environments. Built with a robust stainless steel housing and a protected electric motor, it provides exceptional durability and corrosion resistance. Its versatile design makes it an ideal component for HVAC&R systems and diverse industrial process applications.

Technical Specifications

Pump Type	Self-Priming
Materials	Stainless Steel Housing, Corrosion Resistant Coating

Applications

Recommended Use Cases

- HVAC&R systems
- Industrial processing
- Domestic water supply

Design Features

Key Features

Durable Construction • Protective Motor Cover • Corrosion Resistant
