

Self-Priming Water Pump

This self-priming pump is designed for efficient water transfer and circulation. It features a durable stainless steel housing and a robust electric motor with a protective cover.

Product Overview

High-Performance Fluid Management

This high-performance self-priming water pump is engineered for efficient water transfer and reliable circulation across various industrial and commercial applications. Built with a durable stainless steel housing, it offers exceptional resilience and longevity in demanding environments. The unit includes a robust electric motor protected by a sturdy cover, finished with a corrosion-resistant yellow coating for enhanced visibility and operational safety.

Technical Specifications

Finish

Corrosion resistant • High visibility

Key Design Elements

- Self-priming functionality
- Robust electric motor
- Protective motor housing
- Yellow-painted motor body and base

Housing Material

Stainless steel
