

Self-Priming Water Pump for Irrigation and Water Transfer

This self-priming water pump is designed for efficient water transfer and boosting applications. Featuring a robust construction and reliable motor, this pump ensures consistent performance and long service life.

Overview

High-Efficiency Self-Priming Pump

The GS GP series self-priming water pump is engineered for reliable water transfer and pressure boosting applications. Its robust construction and high-performance motor ensure consistent operation and an extended service life in both residential and light commercial environments. The advanced self-priming design facilitates easy start-up and operation, effectively handling air in the suction line for uninterrupted performance.

Key Features

Model Identifier

GP125

Suitable Applications

Irrigation, Pressure Boosting, Water Transfer, Residential Use, Light Commercial Use

Technical Specifications

Performance Highlights

125 GP

Model Series

Self-Priming Capability

Yes
