

# Self-Propelled Agricultural Sprayer

This self-propelled sprayer unit features a gasoline engine powering a pump. It is connected to a large tank and mounted on a wheeled chassis for easy maneuverability in agricultural settings.

## Product Overview

### High-Efficiency Agricultural Sprayer

This self-propelled agricultural sprayer is engineered for versatility and ease of use in demanding field and orchard environments. Featuring a robust gasoline engine and a high-capacity liquid tank, it ensures reliable performance for the application of pesticides, herbicides, or fertilizers. The integrated wheeled chassis and convenient hose reel system allow for excellent maneuverability and efficient dispensing, making it an essential tool for modern agricultural operations.

## Technical Specifications

### Mobility & Handling

- Self-propelled chassis
- Wheeled mobility for field use
- Integrated hose reel system
- Sturdy frame construction

### Core Components

Component	Function
Gasoline Engine	Power supply for pump
Liquid Tank	Storage for chemicals/fertilizers
Hose Reel	Dispensing and application
Wheeled Chassis	Transport and maneuverability

Engine Type	Gasoline
Primary Applications	Pesticide Application, Herbicide Application, Fertilizer Application, Orchard Maintenance
