

Self-Propelled Crop Harvester

This self-propelled harvester is designed for efficient crop harvesting. It features a robust chassis, a powerful engine, and a specialized harvesting head for optimal crop collection.

Overview

High-Efficiency Harvesting Solution

This self-propelled harvester is engineered for large-scale agricultural operations, focusing on maximizing productivity and crop yield. It features a robust chassis paired with a powerful engine and a specialized harvesting head designed for optimal collection. The operator cabin is built for comfort and control, ensuring sustained performance during long working hours.

Key Performance Metrics

Grain Tank Capacity

9265 L

Capacity

Technical Specifications

Operational Features

- Self-propelled drive system
- Adjustable cutting height
- Advanced hydraulic control system

Application Suitability

Large-scale farming, Efficient crop collection
