

Self-Propelled Grain Combine Harvester

This self-propelled grain combine harvester is designed for efficient harvesting of grain crops. It features a robust chassis, a high-capacity grain tank, and a powerful engine.

Overview

High-Efficiency Grain Harvesting

This self-propelled combine harvester is engineered for the reliable harvesting of various grain crops across diverse field conditions. It features a robust chassis integrated with a high-capacity threshing and cleaning system to ensure efficient grain separation. Designed with operator comfort and ease of use in mind, the machine offers adjustable settings for optimal harvesting performance.

Performance Metrics

79 HP

Engine Power

3.5 kg/s

Max Feed Rate

0.7 ha/h

Max Productivity

Technical Specifications

Cutting Width	2750 mm
Model Number	4LD-3(2)

Physical Dimensions

Dimensions (LxWxH)	6200 x 3050 x 3200 mm
Total Weight	4400 kg
