

Self-Propelled Telescopic Boom Lift

This self-propelled aerial work platform features a telescopic boom and basket. It is designed for reaching elevated areas in construction, maintenance, and other industrial applications.

Product Overview

High-Reach Aerial Solution

This self-propelled telescopic boom lift is designed for efficient, safe operations at height across various industrial and construction environments. It features a robust straight-arm telescopic design that provides extended reach and stability for maintenance or installation tasks. Equipped with all-terrain tires and integrated safety systems, this aerial platform ensures reliable performance and worker security in demanding outdoor or indoor job sites.

Key Features

Operational Capabilities

- Self-propelled mobility
- Telescopic straight-arm reach
- All-terrain stability
- Enhanced safety guardrails
- Emergency stop functionality

Certifications & Standards

Industrial Grade, Safety Certified, Aerial Work Platform

Performance Specs

Safety Equipment

Hydraulic Controls • Emergency Stop • Guardrails
