

Self-Propelled Wet Mix Concrete Sprayer

This self-propelled concrete sprayer is a mobile machine for efficient application of wet-mix concrete. It features a robust pumping system, multi-joint spraying boom, and user-friendly control system.

Product Overview

High-Efficiency Wet-Mix Concrete Spraying

The XZPS30 is a professional-grade self-propelled machine engineered for the precise and efficient application of wet-mix concrete. Designed to excel in demanding construction and mining environments, it features a robust pumping system and a multi-joint spraying boom for superior reach and maneuverability. Its integrated user-friendly control system ensures consistent concrete delivery and optimal performance for large-scale infrastructure projects.

Technical Specifications

Application Method	Wet-Mix
Mobility	Self-Propelled, Mobile

Key Features

Operational Performance

30 Class

Model Series Capacity

Standard Equipment

- Multi-joint spraying boom
- High-capacity concrete hopper
- Adjustable spraying nozzle
- Robust pumping system
- User-friendly control console
