

# Self-Refrigerating Ice Cream Maker with Transparent Lid

This ice cream maker features a self-refrigerating unit, eliminating the need to pre-freeze the bowl. It has a transparent lid for easy monitoring and includes a removable mixing paddle for easy cleaning.

## Product Overview

### Professional-Grade Ice Cream Production

The ICK-1380 is a high-efficiency, self-refrigerating ice cream maker designed for consistent performance. Featuring a quick-freeze bowl and a bidirectional mixing motor, it eliminates the need for pre-freezing and ensures smooth, uniform textures. With its durable construction, anti-skid base, and transparent lid for process monitoring, this unit is built for reliable, continuous operation in professional or high-demand environments.

## Technical Specifications

### Power Requirements

<b>100 V</b> Voltage Range	<b>240 V</b> Max Voltage	<b>15 W</b> Max Power
-------------------------------	-----------------------------	--------------------------

Model Number: ICK-1380

Capacity: 1.4 L

## Performance & Operation

Continuous Operation	40 Minutes
Noise Level	65 dba
Motor Motion	Left and right motion

## Design & Safety

Safety & Stability	Anti-skid rubber base, Reversible thermostat, Transparent lid
Cord Length	160 cm
