

Self-Service Gasoline Dispensing Unit with Dual Nozzles

This self-service unit features dual nozzles for different fuel grades. Digital displays show volume and price, while instruction panels offer user guidance.

Product Overview

High-Efficiency Self-Service Dispensing

This self-service gasoline dispensing unit is engineered for modern service stations requiring efficient, reliable fuel delivery. Featuring a dual-nozzle configuration, it supports multiple fuel grades simultaneously, optimizing throughput and customer convenience. The integrated digital interface provides clear, step-by-step guidance for end-users, ensuring a seamless and secure refueling experience.
