

Self-Tapping Countersunk Screws

High-performance self-tapping screws designed for secure fastening in various materials. These screws feature a sharp, pointed tip for easy penetration and a coarse thread for strong holding power.

Product Overview

High-Performance Fastening

These self-tapping countersunk screws are engineered for secure and reliable fastening across a variety of materials. Featuring a sharp, pointed tip for effortless penetration and a coarse thread design, they provide exceptional holding power. The countersunk head ensures a clean, flush finish, making them an ideal choice for professional-grade wood, plastic, and light-gauge metal applications.
