Product Overview

Professional 5-Gallon Production

This semi-automatic blow molding machine is specifically engineered for the high-quality production of 5-gallon containers. Designed to balance automated efficiency with manual control, it provides a flexible solution suitable for various manufacturing scales. Its robust construction ensures consistent, reliable output for large PET plastic containers.

Technical Specifications

Primary Applications

- 5-Gallon Water Bottles
- Large Industrial Containers

Compatible Materials

PET

Operational Details

Performance Features

Precision Molding • Durable Construction • User-Friendly Controls

Operation Type

Semi-Automatic
