Product Overview

Professional Gable Top Filling Solution

The BW-1000 semi-automatic system is a high-performance solution designed for efficient filling and sealing of gable top cartons. Constructed from 304 food-grade stainless steel, this durable system integrates carton forming, capping, and filling processes into a reliable workstation. With its PLC-controlled operation, it ensures consistent output for a wide range of liquid products, making it an ideal choice for small to medium-scale beverage producers.

Technical Specifications

Performance Highlights

1200 cartons/hr
Maximum Output

1000 ml
Max Fill Volume

23 kW
Total Power

1200 kg
Total Weight

Operating Parameters

Parameter	Specification
Fill Volume	250-1000ml
Cold Fill Temp	2-50 °C
