

Semi-Automatic Liquid Filling Machine

This semi-automatic filling machine is designed for dispensing liquids or viscous products into containers. It features adjustable dispensing volume and a foot pedal for operation, ensuring accurate and efficient filling.

Overview

Precision Liquid Dispensing

This semi-automatic liquid filling machine is engineered for the efficient dispensing of liquids and viscous products into various container types. Built with durable stainless steel, it ensures hygiene and longevity for demanding packaging environments. The system utilizes a precise pneumatic cylinder mechanism and an adjustable volume control, allowing operators to achieve consistent filling accuracy with the convenience of foot-pedal activation.

Technical Specifications

Construction Material	Stainless Steel
Operation Mode	Semi-Automatic
Filling Mechanism	Pneumatic Cylinder
Control Method	Foot Pedal

Features

Key Features	Adjustable Volume, Pneumatic Operation, Stainless Steel Build, Viscous Product Compatible
