

Semi-Automatic Pallet Stretch Wrapping Machine

Semi-automatic stretch wrapping machine designed for palletized loads. It features a rotating turntable, adjustable speed control and a programmable control panel for customized wrapping patterns.

Overview

Professional Pallet Wrapping Solution

This semi-automatic stretch wrapping machine is engineered for securing palletized loads efficiently. Featuring a robust heavy-duty steel frame, it ensures stability and long-term durability in demanding environments. The system offers versatile control with adjustable turntable speeds and variable film tension settings, allowing for customized wrapping patterns tailored to various pallet sizes and load types.

Technical Specifications

Machine Type	Semi-Automatic
Frame Construction	Heavy-duty steel

Control & Operation

Control Panel	Yes
Programmable Wrapping Patterns	Yes

Performance Features

Key Performance Metrics

1 Adjustable

Turntable Speed Control

1 Variable

Film Tension Settings

Compatibility

Suitable Applications	Palletized Loads, Transportation Security, Warehouse Storage
