

# Semi-Automatic Paper Meal Box Forming Machine

This semi-automatic machine features two independent working positions and accommodates two free molds. It produces paper dinner cases, meal/lunch boxes, food containers, and dishware by changing the molds.

## ADDITIONAL IMAGES

## Product Overview

### Semi-Automatic Meal Box Forming Machine

This high-efficiency forming machine features two independent working positions, allowing for the versatile production of paper meal boxes, dinner cases, and food containers. By simply changing the molds, manufacturers can achieve varying container sizes to meet diverse market demands. Designed for reliability and consistent output, it is an essential asset for businesses looking to scale their food packaging operations.
