

Semi-Automatic Paste Dispenser

This semi-automatic paste filling machine is designed for dispensing viscous materials with precision. It features a stainless steel hopper for easy loading and cleaning, along with an adjustable filling volume mechanism.

Product Overview

Professional Paste Filling Solution

This semi-automatic paste filling machine is precision-engineered for the accurate dispensing of viscous materials. Designed for versatility and hygiene, it features a stainless steel hopper that facilitates easy loading and maintenance. It is a reliable choice for operations in the food, cosmetic, and pharmaceutical industries where consistent dosing is required.

Technical Specifications

| | |
|------------------|---|
| Operation Type | Semi-Automatic Pneumatic Control |
| Target Materials | Viscous Paste, Liquids, Cream, Food Grade, Cosmetic Grade |
| Body Material | Stainless Steel |

Key Features

Operational Advantages

- Adjustable filling volume mechanism for precise dosing
- Compact design for space-efficient workshop integration
- Easy-clean hopper construction
- Pneumatic controls for long-term reliable performance
